Hi Greg-

I left you a voice mail earlier this afternoon. There have been issues this entire week on the information systems side, and I have been unable to generate any electronic data to complete our response to your information request. Would it be acceptable to get a 7-day extension, to Friday August 17, by which time we hope to have these technical issues resolved?

Kind regards,

Joe Winch, PE

Hi Joe,

Per your voice mail, August 10th sounds good to get this information.

Thanks,

Greg

Subject: Inspection follow up questions

Hi Joe,

I've attached a sheet with several follow up questions to my inspection.

Why don't you give me a call to discuss once you've had a chance to look them over?

Thanks,

Greg

Hi Greg-

This is in response to the question you presented during the inspection a couple of weeks ago

regarding the instrumentation used during the LDAR inspections.

Kind regards,

Joe Winch
